Pratik Wadke

Software Engineer @ Apollo Global Management | Building Scalable Data Platforms | Java/Kotlin • Spring Boot • Snowflake • Azure • Temporal • AI Search

Mumbai, Maharashtra, India

Summary

Data Engineer with experience building scalable data platforms and backend systems at Apollo Global Management. I specialize in designing high-performance data services on Snowflake and Azure, with a strong focus on distributed systems, data quality, and observability. My work includes building metadata-driven APIs, implementing Temporal workflows for data governance, and developing AI-powered data discovery systems using embeddings and vector search. I enjoy solving complex data problems — from optimizing multi-million row queries using keyset pagination to enabling intelligent enterprise data search through semantic layers. Tech stack includes: Java, Kotlin, Spring Boot, Snowflake, Azure AKS, Redis, Temporal, and modern data/AI tooling. Currently exploring: AI-native data platforms, LLM integrations, and scalable search systems.

Experience

Apollo Global Management, Inc.

Software Analyst

June 2024 - Present (1 year 11 months)

Mumbai

- Built a metadata-driven Data API for multi-million row Snowflake datasets using keyset pagination, significantly reducing query latency
- Developed data quality metrics platform using Temporal workflows for row- and column-level evaluation
- Designed AI-powered semantic search using embeddings and vector search to improve enterprise data discovery
- Integrated Collibra APIs to surface governance scores and data quality insights
- Deployed scalable microservices on Azure AKS with Redis caching and Prometheus-based observability

Kenmark ITan Solutions

Backend Developer

November 2023 - June 2024 (8 months)

Mumbai

- Developed backend services for a B2B/B2C e-commerce platform using Node.js and Express
- Designed modular APIs supporting multiple user roles including Sellers, Customers, Admins, and Medical Representatives
- Implemented RESTful APIs and optimized database interactions for improved performance and scalability
- Collaborated with frontend and product teams to deliver end-to-end features in an agile environment

Tech Astute

Full-stack Developer

July 2022 - June 2024 (2 years)

India

- Built a client-facing dashboard using React, Redux, and Material-UI with features like admin panel, OTP authentication, and regional language support
- Developed RESTful APIs using Node.js and MySQL for handling user data and application workflows
- Improved user experience by implementing responsive UI components and efficient state management
- Collaborated using Git and participated in feature planning and development cycles

DJSCE ACM Student Chapter

VCP INFOTECH HEAD

August 2022 - September 2023 (1 year 2 months)

Mumbai

- Led a team to design and develop web platforms for college events, hackathons, and internship fairs
- Managed end-to-end development and deployment of scalable web applications
- Coordinated with cross-functional teams to ensure timely delivery of technical solutions
- Mentored junior developers and contributed to building a strong technical community

Apollo Global Management, Inc.

Data Engineer

June 2023 - August 2023 (3 months)

Mumbai

- Built data pipelines using Azure Data Factory for ingestion and transformation of enterprise datasets
- Developed Spring Boot services to support data platform workflows and integrations
- Conducted Snowflake load testing using JMeter to analyze and optimize warehouse performance
- Gained hands-on experience with cloud-based data platforms and large-scale data processing

ParkIt.biz

Backend Developer

December 2022 - May 2023 (6 months)

Mumbai

- Developed backend services for a parking management platform using Node.js and Express
- Designed APIs for booking, availability tracking, and user management
- Integrated database operations to ensure efficient handling of real-time parking data
- Contributed to improving system reliability and performance through structured backend design

Education

Dwarkadas J. Sanghvi College of Engineering

Bachelor of Technology - BTech, Information Technology · (2020 - 2024)
