EDUCATION

Dwarkadas J. Sanghvi College of Engineering <i>B.Tech in Information Technology with Honors in DevOps – CGPA: 9.3/10</i>	Dec 2020 – May 2024 <i>Mumbai, India</i>
Nirmala Memorial Foundation Junior College <i>Higher Secondary Certificate (HSC), Maharashtra State Board – 82%</i>	June 2018 – May 2020 <i>Mumbai, India</i>

EXPERIENCE

Apollo Global Management <i>Software Developer, Data Engineering</i>	June 2024 – Present <i>Mumbai, India</i>
- Engineered Delphi Data API (Data Viewer Service) for multi-million row Snowflake datasets, leveraging keyset pagination and metadata-driven query patterns to significantly reduce query latency and eliminate repetitive Information Schema scans - Built a Metrics Service for governance of data assets using Temporal workflows, enabling row- and column-level data quality evaluation and improving production reliability through structured logging (MDC) and Prometheus-based observability - Developed an AI-driven MCP server for the Delphi Marketplace, leveraging metadata to create dynamic tools enabling natural language question answering and intelligent discovery of enterprise data assets - Designed and implemented semantic search using Snowflake Cortex embeddings and vector search to improve enterprise data asset discovery - Integrated Collibra (REST+GraphQL APIs) to surface governance scores, enriched metadata, and live data quality insights within the marketplace - Deployed backend microservices on Azure AKS, integrating Azure services and implementing Redis-backed indexing and caching for performance optimization	
Kenmark ITan Solutions <i>Backend Developer Intern</i>	Nov 2023 – June 2024 <i>Remote</i>
- Developed backend services for a B2B/B2C e-commerce platform using Node.js - Designed modular architecture supporting Sellers, Customers, Admin, and Medical Representatives	
Apollo Global Management <i>Data Engineering Intern</i>	June 2023 – Aug 2023 <i>Mumbai, India</i>
- Built Azure Data Factory pipelines and Spring Boot services - Conducted Snowflake load testing using JMeter to optimize warehouse performance	
Tech Astute <i>Full Stack Developer Intern</i>	June 2022 – Feb 2023 <i>Mumbai, India</i>
- Built a client-facing dashboard using React, Redux, and Material-UI with features like admin panel, regional language support, and OTP verification. - Developed RESTful APIs with Express and MySQL and collaborated using Git and Xmind.	

TECHNICAL SKILLS

Languages: Java, Kotlin, Python, SQL, JavaScript, C++
Frameworks: Spring Boot, Spring WebFlux, Node.js, GraphQL, Temporal, React.js
Data & AI: Snowflake, Redis, MySQL, MongoDB, Vector Search, Embeddings
Cloud & DevOps: Azure AKS, Azure DevOps, Prometheus, EventHub, GitHub
Concepts: Data Structures & Algorithms, Distributed Systems, REST APIs, Keyset Pagination, Caching, ETL Pipelines, Observability, Reactive Programming

ACHIEVEMENTS & EXTRACURRICULAR

Google Hash Code 2022: Achieved Global Rank 2278 and India Rank 710 among thousands of competing teams
Tech Head, DJ ACM (2022–2023): Led a team to build and deploy web platforms supporting large-scale events, hackathons, and internship fairs
HackNova Hackathon: Finalist at a national-level hackathon hosted by Thakur College of Engineering
